Perceived safety during the day and night, San Francisco, 2001-2017

Time of Day

- Perceived safety during day
- Perceived safety at night

Source: San Francisco City Survey via DataSF (residents were asked how safe they feel walking alone in their neighborhood during the day and night)

* In 2015, the survey methodology changed from mail to phone in order to reach a more representative sample of San Francisco residents. Therefore, differences in results from years prior to 2015 should be interpreted with caution.
